Minutes of the Client Meeting

Group 22-N

Friday 22th Mar 2024

Minutes are written by: Siyu Ni

Host: Vishal Dixit

Members: Li-Ting Liao

Nilangi Edirisinghe

Vishal Dixit

Yuyue Chang (Garnet)

Apologies: None.

1 Time and Place

The client meeting for the Software Engineering Group Project was held in ZOOM at 10.00am on Friday 22th May 2024.

2 Quorum Announcement

Vishal presented what we have done for the pitch presentation and explained the slides we made. Members ask questions about the following Milestone works.

3 Summary of Previous Meeting

Vishal briefly showed the preparation of the pitch presentation and Milestone. And other people asked questions about functions and presentation.

4 Q&A

1.   Designing the React frontend, especially for complex pages like Counseling Services or Blog list.

2. User session management and authentication across different roles (visitors, registered users, doctors, admins). User story , next functionality.

3. MongoDB collections structure for Users, Doctors, Blogs, and Feedbacks data.

4. Security measures for API routes against unauthorized access and protection of sensitive user information.

5. Image/file uploads and potential live stream channel for doctors on Blog and Doctor detail pages. Yes

6. Considerations for handling large volumes of data and traffic, particularly on pages listing multiple items.

7. Need for supporting multiple languages on the frontend.

8. Requirement for real-time updates or notifications in any part of the application.

9. Backend scaling strategies with the growth in data and user base, especially for dynamic content.

10. Reviewing the pitch presentation and discussing the business case.

11. Cross-browser compatibility for the website to ensure correct functionality across different browsers.

Previous questions are basically functions, they looks good.

Extra question:

About subscriber function and VIP setting: Good, that is a cool idea.

Presentation suggestion

<u>Why our website better than others</u>

Cite from researcher to prove our website is good. For example, this website is offering A. Even though this is not a research essay. Have you compare with other website? Did you use citation evidence to prove? Pay attention about the limit of all features, the gap that we found we could provide on our website. However, we don't have to include all features. The goal is to attract users , what kind of features could attract potential users. The difference is only on the feature. One thing is enough to show contribution of this website.

Potential challenges

Maybe games to be attractive

Don't have to put too much single page. For presentation, may one example, key words down there telling people about our website.
