Agenda

Date: Mar 8, 2024
Host: Nilangi
Minutes: Garnet

Project Questions to ask

Each one of us can ask some of these questions here:

- Any technology stacks the client wants to see us using?
- Any database the client wants to access?
- Any dummy data the client can provide for us to seed the database?
- Is there any estimated user traffic for this website?
- Any target users for the website?
- Functional and non-functional requirements.
- Any other functions/ features the client expects to see from the website.
  - Below are our current understanding functions:
    - Expert-led Content:
      - Develop a platform for experts to share content related to mental health and wellbeing.
      - Include multimedia content such as articles, videos, and interactive sessions.
    - Community Engagement:
      - Build a user profile system for individuals to join and create communities.
      - Implement forums or discussion boards for community engagement.
    - User Interaction and Social Features:
      - Include features for liking, commenting, and sharing content within the platform.
- Ask the client if she's willing to meet with us during the mid-semester break.
- Ask the client about her available time for regular weekly meetings.
- Other questions

Note

The next meeting will be held on xx
